

## Quick MC Quiz: End Module 4, Prep Module 5

Do not refer to any printed material. No talking or discussion is allowed until the answer sheets are all collected.

### Review:

1. Which of the following commands can list all files in `/etc` and below, showing their types?
  - (A) `$ find /etc | file`
  - (B) `$ file /etc/* | find -type`
  - (C) `$ find /etc | xargs file`
  - (D) `$ file --replace -exec find /etc`
2. Select one fact about the `cpio` and/or `tar` commands:
  - (A) Both can create an archive of files
  - (B) RPMs are just `tar` files
  - (C) `tar` must always read filenames from standard input
  - (D) `cpio` is more widely used than `tar`
3. The command: `ldd /bin/bash` shows:
  - (A) not a dynamic executable
  - (B) shared libraries that `/bin/bash` is linked to
  - (C) no output
  - (D) an error message

### Preparation:

4. Common filesystem types on Linux include:
  - (A) `cdfilesystem`
  - (B) `apache`
  - (C) `ext3`
  - (D) `bash`
5. An *absolute filename* always begins with:
  - (A) a dot: “.”
  - (B) a slash: “/”
  - (C) a double dot: “..”
  - (D) a tilde: “~”
